

# Aebi | Combicut double wheel system

Compatible with CC 56/66/140e/150/160

Attaching and changing double wheels on our single-axle mowers is now quicker and easier. A new, well thought-out adapter system enables dual wheels to be fitted in next to no time. The system works with existing tyres as well as with our new pneumatic spiked wheels.

## The new double wheel concept

- The new spacer enables double wheels to be fitted in just a few seconds with just one screw.
- One-time pre-installation of the base plate with the base wheel, then **the double wheels are easily mounted/dismounted using the central screw.**
- The double tyres **fit onto the spacer from both sides** to vary the desired outer width.
- There **are no scratches or damage to the rims.** The forces of the dual wheel are absorbed directly by the machine without loading the rim of the base wheel.
- Aebi standard rims and **existing tyres are compatible.**

## The new pneumatic spiked wheels

- **High driving comfort on any surface:** the pneumatic spiked wheels absorb shocks and vibrations to the maximum.
- **Perfect ground adaptation:** The wheels adapt perfectly to the ground, protect the turf and offer the best grip on the steepest terrain.
- **Compatible and retrofittable:** Supplied together with Aebi standard wheel rims and can be used individually or as double wheels with other existing basic tyres. Suitable for all Aebi Combicuts of the large series.

## Tyre variants for large CC series

The models illustrated show a selection of the available tyre variants. The wheels are supplied with Aebi standard rims and can be combined with the double wheel system. Ask your local Aebi market partner for advice.

**Terra tyres**

23x10.50-12

**Terry tyres**

23x8.50-12

**Pneumatic spiked**

23x10.50-12

**AS**

6.50/80-12

**Turf tyres**

23x8.50-12

## Application instructions

**1** Attach base plate

**2** Place the spacer on the base plate

**3** Fit and screw on the double wheel

**4** Mount/Dismount

One-time pre-installation

Attach double wheels in a few seconds
